

FILMIC CRISP

SFX

Thanks for downloading the free Filmic Crisp SFX pack!

You might be curious...**why did I create a sfx pack?** I've found it very hard to find a valuable 'one time purchase' SFX pack as of late. I used to use a site that allowed you to pay for a number of sounds that you select and like so many companies as of late, they've turned to a subscription model to make an extra buck. I've been tired of feeling like I had to pay every month in order to get the sounds that I needed. I wanted a solid 'buy once' pack that covers a multitude of bases. Something that could be used on pretty much every project. So I worked together with a professional sound designer to create these fully royalty-free sound effects and the ones in the full, paid version of over 328 sounds, so you (and I) no longer have to pay a crazy amount every month just to use great sounds in our videos. I really hope that these enable you to get more creative in your edits and satisfy that part of video creation that's so incredibly important and often underutilized...

sound design.

If looking to get the full pack of 328 sounds and support and independent creator like myself, use the link below and enter the code NEEDMORE33 to get an additional \$20 off the pack!
